Turn-Key Design-Build Hangar Delivered to Airport Authority

Sanford Contractors was hired to design and build a new hangar at Raleigh Executive Jetport. Sanford Lee County Airport Authority enlisted their help with the turnkey design-build project to accommodate the Jetport's growing customer base of corporate flights and recreational pilots.

Sanford Contractors was hired for both the design and construction of this 16,700 square foot hangar, which will be used for aircraft storage. As the Design-Build team, they acted as the primary point of contact for the client and oversaw the numerous trade partners, including McKim & Creed and Sherman Architecture.

Throughout the process, Sanford Contractors offered expert recommendations and maintained clear and consistent communication with all collaborators. As a result, the project was completed on time and within budget.
