Project Size:

Single Span Bridge
Replacement

Ahead of Schedule: Chatham Bridge Replacement Over Robeson Creek

When the bridge over Robeson Creek in Chatham County reached the end of its service life, the North Carolina Department of Transportation and the County of Chatham turned to Sanford Contractors for a reliable solution.

The Sanford Contractors team began by safely demolishing and removing the existing structure before moving into grading and drainage operations. A key component of the project included relocating an existing waterline, a task completed with precision and coordination to avoid service disruptions.

Thanks to effective planning, teamwork, and execution, the new bridge was delivered to NCDOT one month ahead of schedule.
