

BUILDING WITH TRUST

Galilee Road Emergency Express Design Build

Division:

Bridge and
Heavy Construction

Location:

Galilee Road
Johnston County, NC

Client:

NCDOT

Service Period:

November 2020 - March
2021

Services Provided:

- Existing Structure Removal
- Clearing and Grubbing
- Earthwork and Storm Drainage
- Bridge Construction
- Curb, Base and Paving

Project Size:

Single Span Bridge
Replacement

Express Design Build Completed to Alleviate Flood Impacts

A heavy flooding event in November 2020 caused extensive structural damage to Bridge #82 in Johnston County. With a key piece of infrastructure out of service, the North Carolina Department of Transportation moved quickly to secure its immediate replacement under an Emergency Contract.

Sanford Contractors mobilized immediately to begin site cleanup and stabilization, while design partner Wetherill Engineering initiated the design process. Sanford Contractors also provided assistance during the design phase to help expedite the project timeline.

The shared goal was to deliver a reliable, well-built structure that would restore connectivity and meet Johnston County's infrastructure needs. Just four months after contract award, Sanford Contractors delivered the completed bridge to NCDOT — a result that underscored the team's responsiveness and commitment to excellence under pressure.
