August 2018 - August  
2020

**Services Provided:**

- Bridge Construction

**Project Size:**

- 14 new bridge structures
- Over 3,600 linear feet of bridge deck

## **Fourteen New Bridges Delivered for C.F. Harvey Parkway Extension**

In 2018, Sanford Contractors was selected to construct fourteen new bridge structures as part of the C.F. Harvey Parkway Extension, enhancing regional connectivity between NC 58 and NC 11 in Lenoir County.

Serving as a subcontractor to Branch Civil—the project’s General Contractor for NCDOT—Sanford Contractors collaborated closely to identify critical path structures. Over the course of the project, Sanford Contractors built more than 3,600 linear feet of bridge deck across seven sets of dual bridges, carefully timed to support Branch Civil’s grading operations.

Despite the project’s complexity and scale, Sanford Contractors completed all fourteen bridges ahead of schedule, delivering the work to Branch Civil an impressive 200 days early.
