Project Size:

Three-Span Bridge
Replacement

Upgraded Bridge Delivered to Village of Whispering Pines

When the Village of Whispering Pines faced the need to replace a deteriorating bridge, they issued a competitive bid to find the right team for the job. Sanford Contractors was awarded the contract and brought trusted experience to lead the bridge replacement project.

Sanford Contractors partnered with Wetherill Engineering for this project. Together, a new and improved bridge was brought to life. The new structure was designed not only to be safer than the original but also to improve the flow of boat traffic through the canal.

This three-span bridge was finished with beautiful, decorative stone railing, adding a thoughtful touch that fits perfectly within this lakeside community. The result is a safer, more functional structure that enhances both appearance and infrastructure — and reflects the Village's trust in Sanford Contractors to deliver lasting value.
