

**FAMILY OWNED & OPERATED SINCE 1969**

Sanford Contractors is one of North Carolina's most experienced providers of construction services for commercial, residential, industrial, municipal and state projects. Our mission is to deliver the highest quality project that exceeds the expectations of our partners while ensuring the safety, wellbeing and professional development of our team members.

Our values are the core of how we operate. Sanford Contractors team members are guided by the Golden Rule, accountable, relationship-focused, prepared and driven.

## **BRIDGE CONSTRUCTION**

The Bridge and Heavy Construction Division specializes in bridge and concrete construction. Experienced and skilled team members deliver projects of unsurpassed quality. We handle public and private bridge construction, build retaining and noise walls and install piles and sheeting.

## **COMMERCIAL BUILDING**

The Commercial Building Division serves clients through different project delivery methods, including hard-bid, design-build assist and complete design-build. We offer pre-construction cost analysis, constructibility review and detailed scheduling to assist clients' decision-making processes.

## **SITE DEVELOPMENT**

From mass earthmoving to fine grading and shaping, the Site Division can perform all services needed for turn-key site development. Projects include large residential communities, industrial sites, shopping centers, schools, athletic complexes, landfills and NCDOT roadway projects.

## **UTILITY CONSTRUCTION**

The Utility Division builds reliable infrastructure to support thriving communities. We handle construction of water lines, sewer lines, water pump stations and treatment plants for public and private entities and DOT projects throughout North Carolina.
